

Jordan River Recreation Park Proposal

“Healthy and functioning river systems are appealing and attractive to residents and businesses, which in return create touristic advantages, cost-effective flood control, improved water quality, reduced infrastructure costs and increased property values and tax base.” -Bulent Cengiz in Urban River Landscapes

Solution?

Jordan River Recreation Park

*A unique partnership to preserve, protect, and open up this
area for recreation for countless Utahns*

- An overlay zone 250 yards on either side of the Jordan River between SR-201 and 4430 South, excluding areas within Murray City.
- Administered by the Jordan River Commission with State Parks, Salt Lake County, four cities directing.

All of the one-time state appropriations and at least half of the ongoing appropriations shall be used for **capital improvements** within that zone, designed for increasing the safety and recreational attractiveness of that zone. These may include:

- Lighting along the Jordan River Parkway
- Completing the Jordan River Parkway along both sides of the river
- Building boat launches, picnic pavilions, benches, restrooms, or other amenities
- Supporting capital improvements for aviaries, nature areas, bike and boat rental concessionaires, or other partnerships that are enhancing recreation in this zone

Other appropriations shall be used to fund a River Ranger program to increase official patrols of the river corridor, partner with local law enforcement as needed, and assist in keeping the area clean and safe.

The park committee may partner with existing ranger programs to achieve this (State Parks, Urban Ranger Program, off duty police officers, etc.)

Appropriations Request:

\$500,000 (one time) & \$500,000 (ongoing)

A scenic landscape photograph featuring a wooden suspension bridge crossing a calm river. The bridge is constructed of dark wood with metal cables and has a wooden walkway with railings. The river reflects the surrounding greenery and the bridge's structure. In the background, a range of mountains is visible under a soft, golden light from a low sun, creating a warm, hazy atmosphere. The foreground shows a grassy bank with some small plants and a wooden platform leading to the bridge. The overall scene is peaceful and picturesque.
